

Health Insurance Charges Report

Xiang Li

11/30/2021

Abstract

Health insurance pays for some or all the cost of the health services you receive, like doctors' visits, hospital stays, and visits to the emergency room. It helps keep your health care costs predictable and affordable. Although being covered by your insurance, you may still have to pay amounts for health insurance, such as premium. In this report, I will analyze how the insurance charges are affected by other factors. ##
Introduction

Method

Data

Column names	Explanation
age	Age of primary beneficiary
sex	Insurance contractor gender, female / male
bmi	Body mass index
children	Number of children covered by health insurance
smoker	Smoker / Non - smoker
